

Paper Reading & Discussion

Paper Title	Using Session Modeling to Estimate HTTP-Based Video QoE Metrics From Encrypted Network Traffic
DOI	10.1109/TNSM.2019.2924942.
Name	Sahil Pattni
Concordia ID	40216177
Course	COMP 691
Lecture	6

Questions & Comments

- The authors clearly list the drawbacks and/or the limitations of their system, and note how future work could address such issues.
- This system works by reading TCP headers, which is not available in protocols such as QUIC.
- Future work by (some of) the same authors addresses some of the limitations by removing the need for headers (second paper this lecture).
